

Microsoft (MS) Edge Tune-up for P260

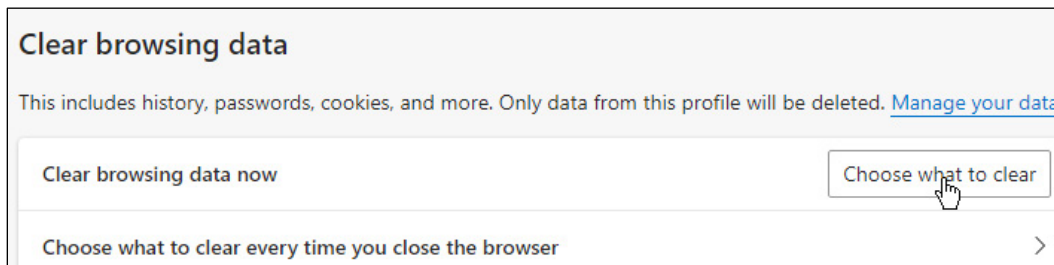

Here's how you tune up MS Edge so that it better supports the P260 software.

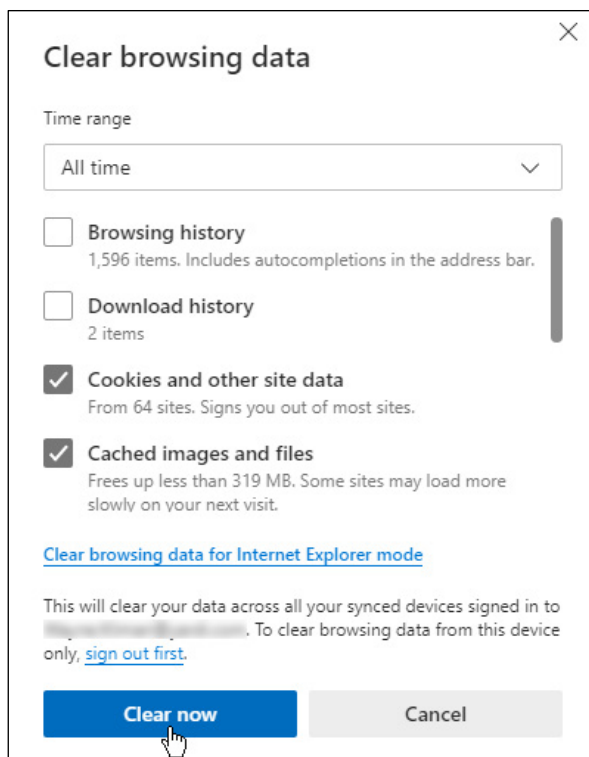

Be sure that you are completely logged out of P260 or P260 Portal before doing this tune-up.

Deleting temporary Internet files and cookies

1. Open MS Edge.
2. On the keyboard, hold down **Ctrl + Shift** and tap the **Delete** key **or** click the “Settings and more” button  in the upper right corner, and select **Settings > Privacy, search, and services**. Scroll down to the **Clear browsing data now** area, and click “Choose what to clear.”

The Clear browsing data dialog box displays.

3. Confirm that the Time Range is “All Time.”
4. Be sure boxes three and four (see above) are checked—“Cookies and other site data” and “Cached images and files.” The other check boxes are optional.
5. Click the **Clear now** button, wait until the data is removed, then close the **Settings** tab.

Checking to see if you have the latest version of MS Edge

1. Open MS Edge.
2. Click the Settings and more button  in the upper right corner.
3. Select **Help and feedback > About Microsoft Edge**.
If you're not using the latest version of MS Edge, click the Update button to get the latest version.
